Brief CV: Dr Warnakulasuriya is currently Professor of Oral Medicine & Experimental Oral Pathology at King's College London. He is an honorary consultant in Oral Medicine to King's College Hospital, Guy's and St Thomas' NHS Trust and Northwick Park Hospitals NHS Trust. Dr Warnakulasuriya has published and lectured extensively on the subject of oral cancer and precancer from the levels of basic science to the management. He is an authority on global aspects of risk factors for oral cancer having conducted several field surveys both in Asia and Northern Africa. In Collaboration with the World Health Organization he conducted several innovative studies on screening for oral cancer using the primary health care model. He has contributed to the evaluation of carcinogenic risks of tobacco and areca nut to human populations as a member of the monograph group at the International Agency for Research on Cancer.
